AN EXCLUSIVE COLLECTION

TORONTO

Features & Finishes

—
UNPARALLELED LEVEL
OF FINE FINISHES

DEERPARKCROSSING.CA

Deer Park Crossing was designed to provide a superior level of finishes, fittings, fixtures and appliances on par with those of a custom designed luxury residential home. With this promise of excellence, we have provided an outline created with the greatest attention to quality and detail available in the residential townhome market today. Although our Model Home gives us the ability to showcase much in the realm of possibilities, the following document shall serve to outline the specific elements of each home. In keeping with our commitment to enabling our residents to personalize their own unique residence, we are encouraging our buyers to finish the lower-level space according to their personal needs and requirements. Options for lower-level customization is attached.

Type of HVAC – split-zoned system. Each townhome has two furnaces and two air conditioning units. The basement and first floors are serviced by one HVAC system; the second and third floors are serviced by a separate system. This arrangement assures a superior ability to heat or cool different rooms within the dwelling to the desired temperature.
